

Monograph Lettering Adobe Illustrator

Open Adobe Illustrator, and select **File > New** to create a new document. Choose **Print** format and select **(4) Artboards** in the **Preset Details** panel.

Select the **Paintbrush Tool**. In the **Properties** panel, select a **Brush**. There are a variety of brush styles and stroke styles to choose from. Click on the brush libraries for more brushes and styles.

Using the many brushes and stroke styles, **create different designs in each box**, using your initials, or any two letters of your choice. Here are some ideas to try.

- In box one, **stretch** one letter to touch the top and bottom of the box with the second letter being smaller.
 - In box two, **stack** one letter on top of the other.
 - In box three, **twist** and **curve** your letters in uncomfortable ways.
 - In box four, make each letter **touch all four edges** of the box.
-
